THE PROBLEM

A busy OPD runs on a paper pad and memory

व्यस्त OPD आज भी काग़ज़ और याददाश्त पर चलती है

01

40–80 patients a day

Writing the same medicines again and again. Every minute spent writing is a minute not spent with the patient.

02

Patients forget the doses

"Subah-shaam ya teen baar?" They call back, or take the medicine wrongly. The English parchi doesn't help them at home.

03

History lives in a plastic folder

Old prescriptions and lab slips come in a bag. No time to read them all, so trends like HbA1c are missed.

04

Rules are getting stricter

NMC wants generic names, legibly, in capitals. The DPDP Act will need patient consent and secure records by 2027.

Most software isn't built for this doctor.

It's English-first, made for metro specialists, priced at ₹12,000–18,000 a year, and slower than the pen. Small-town GPs stay on paper because nothing fits how they actually work.

ARX · CHIRANJEEV KUMAR

Chiranjeev Kumar · +91 95465 19953

THE SOLUTION

Three steps. No new habits.

तीन आसान कदम, आदत वही

STEP 1

Patient books on WhatsApp

Picks a slot, describes the problem, sends photos of old prescriptions and reports. No app to install.

STEP 2

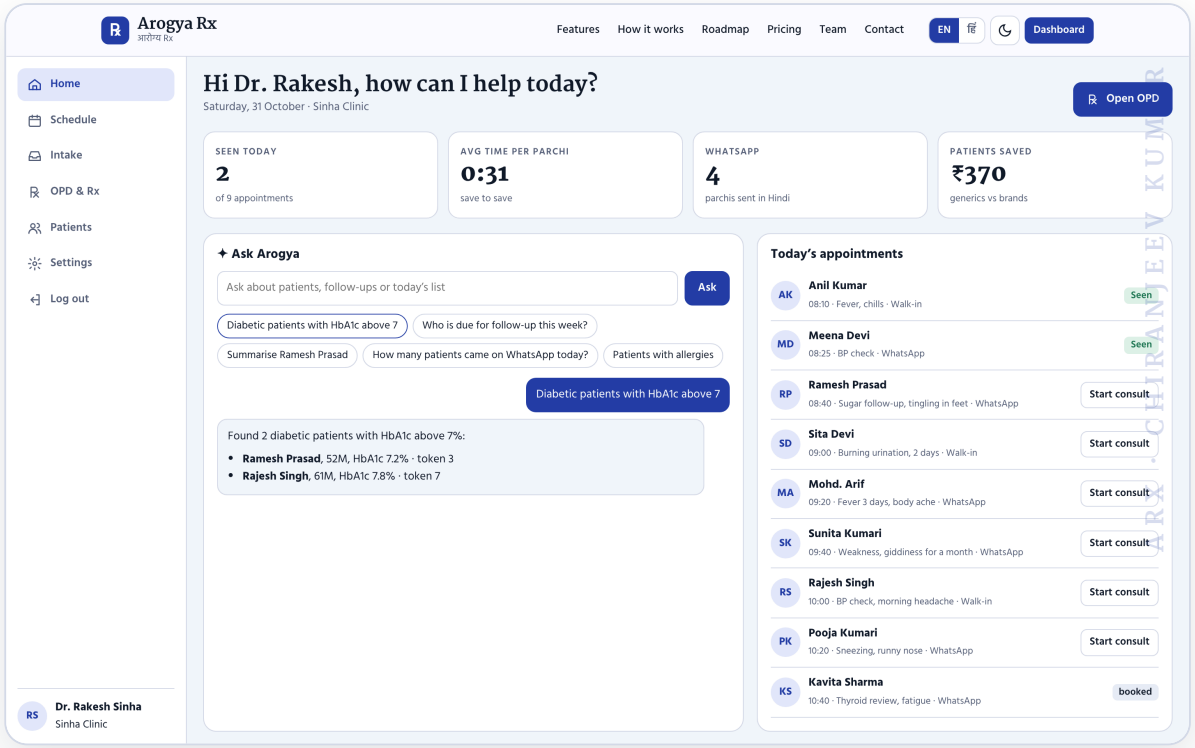

Arogya Rx prepares the case

Old prescriptions and lab values become a short summary and trend chart, ready before the patient sits down.

STEP 3

You confirm and print in 30 seconds

Tap a template or speak the consult. Check it, print on your letterhead, and it goes to the patient's WhatsApp in Hindi.

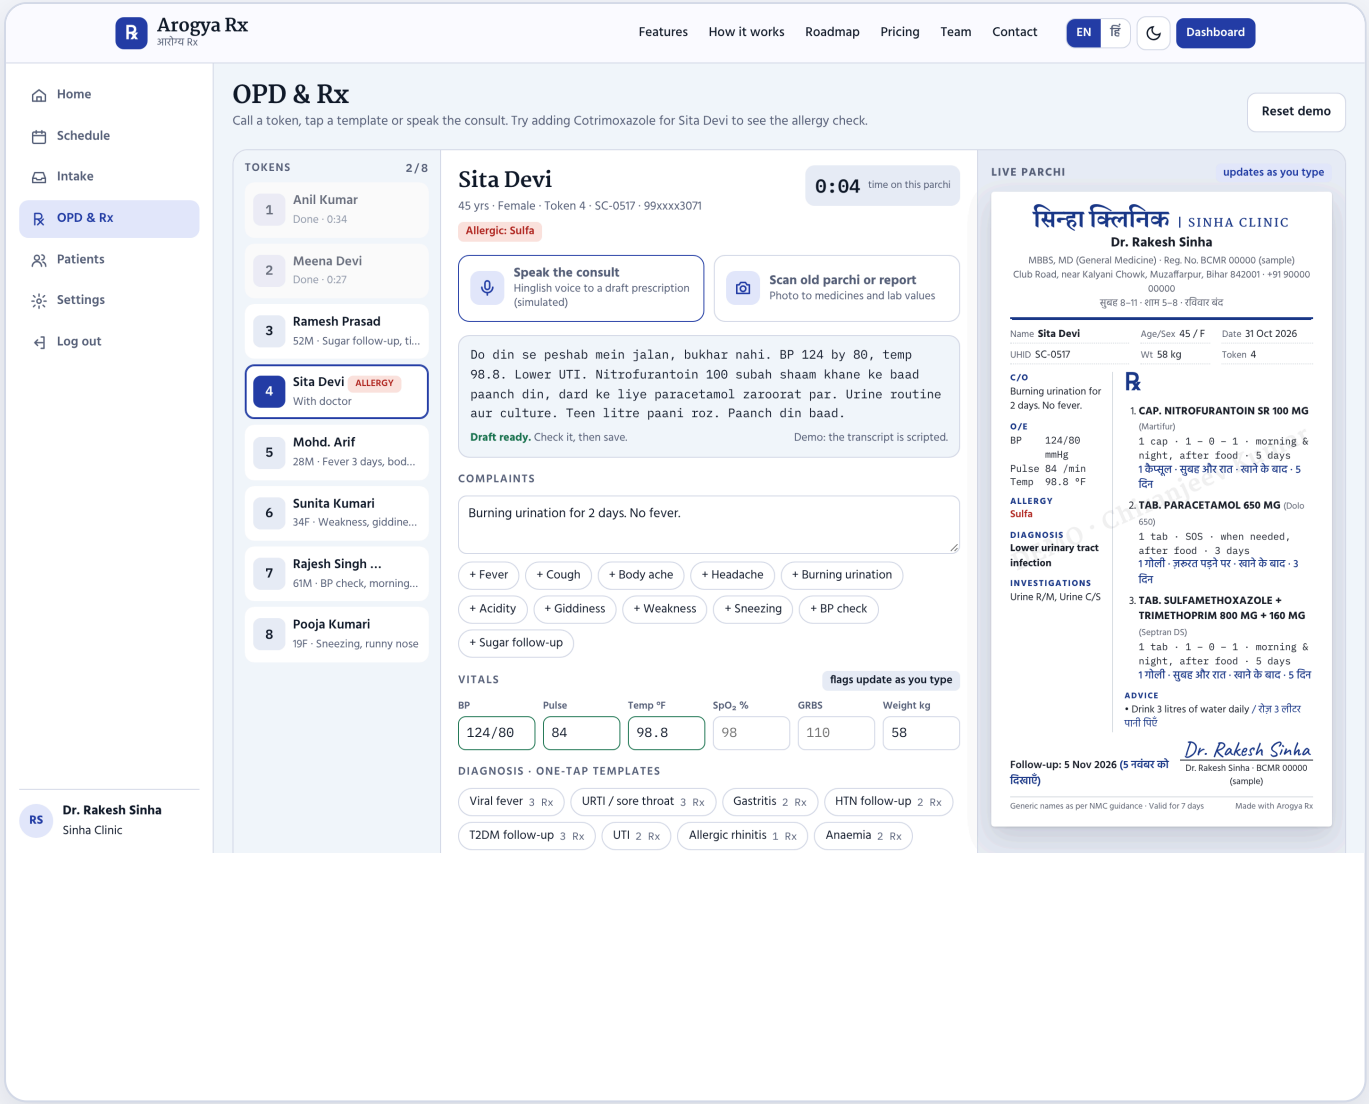

Home screen: today's appointments, clinic numbers and **Ask Arogya**, which answers questions about your patients in plain words.

Chiranjeev Kumar · chiranjeevkumar47@gmail.com

IN THE CONSULT ROOM

A full prescription in about 30 seconds

लगभग 30 सेकंड में पूरी पर्ची

1 Token queue

Your compounder adds the patient; they appear in your list with a token.

2 Speak or tap

Speak in Hinglish, or tap a template like "Viral fever": medicines, doses, tests and follow-up fill in.

3 Safety built in

Allergy blocks the save. Duplicate medicines and abnormal vitals are flagged in colour.

4 Live parchi

The printout updates as you type. What you see is what prints.

ARX · CHIRANJEEV KUMAR

WHAT LEAVES YOUR CLINIC

Your letterhead, your style, legible every time

आपका letterhead, हर बार साफ़ पर्ची

Generic names as per NMC guidance · Valid for 7 days — Made with Arogya Rx

DEMO · Chiranjeev Kumar

- ✓ **Looks exactly like your pad.** We rebuild your Hindi clinic name, degrees, registration number and layout during setup.
- ✓ **Generic name in CAPITALS first**, brand in brackets, as the NMC asks.
- ✓ **Hindi line under every medicine**: "1 गोली · सुबह और रात · खाने के बाद · 5 दिन".
- ✓ **Follow-up date in both languages**, with a WhatsApp reminder the day before.

MEDICINES — Jan Aushadhi price shown

Type a generic or brand name, e.g. pan, dolo, telmi

MEDICINE (GENERIC FIRST)	DOSE	WHEN	FOOD	DAYS
CAP. NITROFURANTOIN SR 100 mg · Martifur	1	1-0-1	after food	5
TAB. PARACETAMOL 650 mg · Dolo 650	1	SOS	after food	3
TAB. SULFAMETHOXAZOLE + TRIMETHOPRIM 800 mg + 160 mg · Septran DS	1	1-0-1	after food	5

CHIRANJEEV KUMAR · ARX

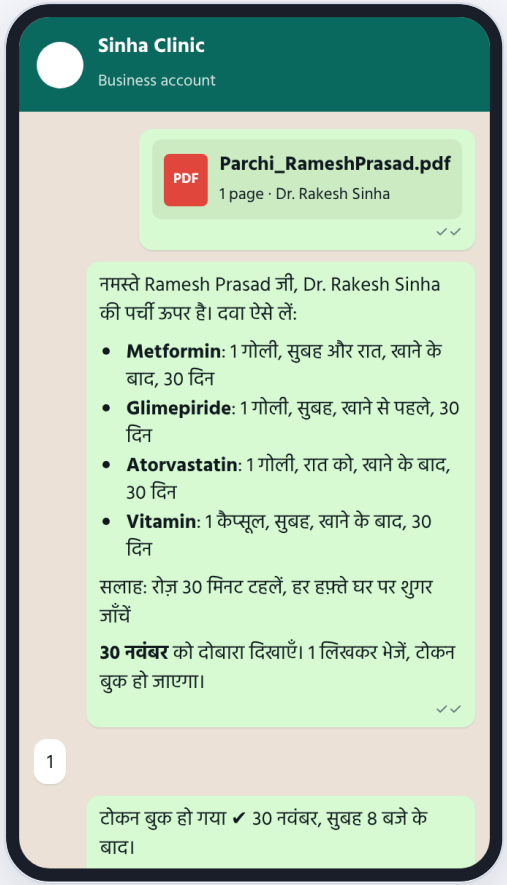

Above: adding a sulfa drug for a patient with a sulfa allergy is blocked. The box below shows what the patient pays for brands versus Jan Aushadhi generics.

Chiranjeev Kumar · chiranjeevkumar47@gmail.com

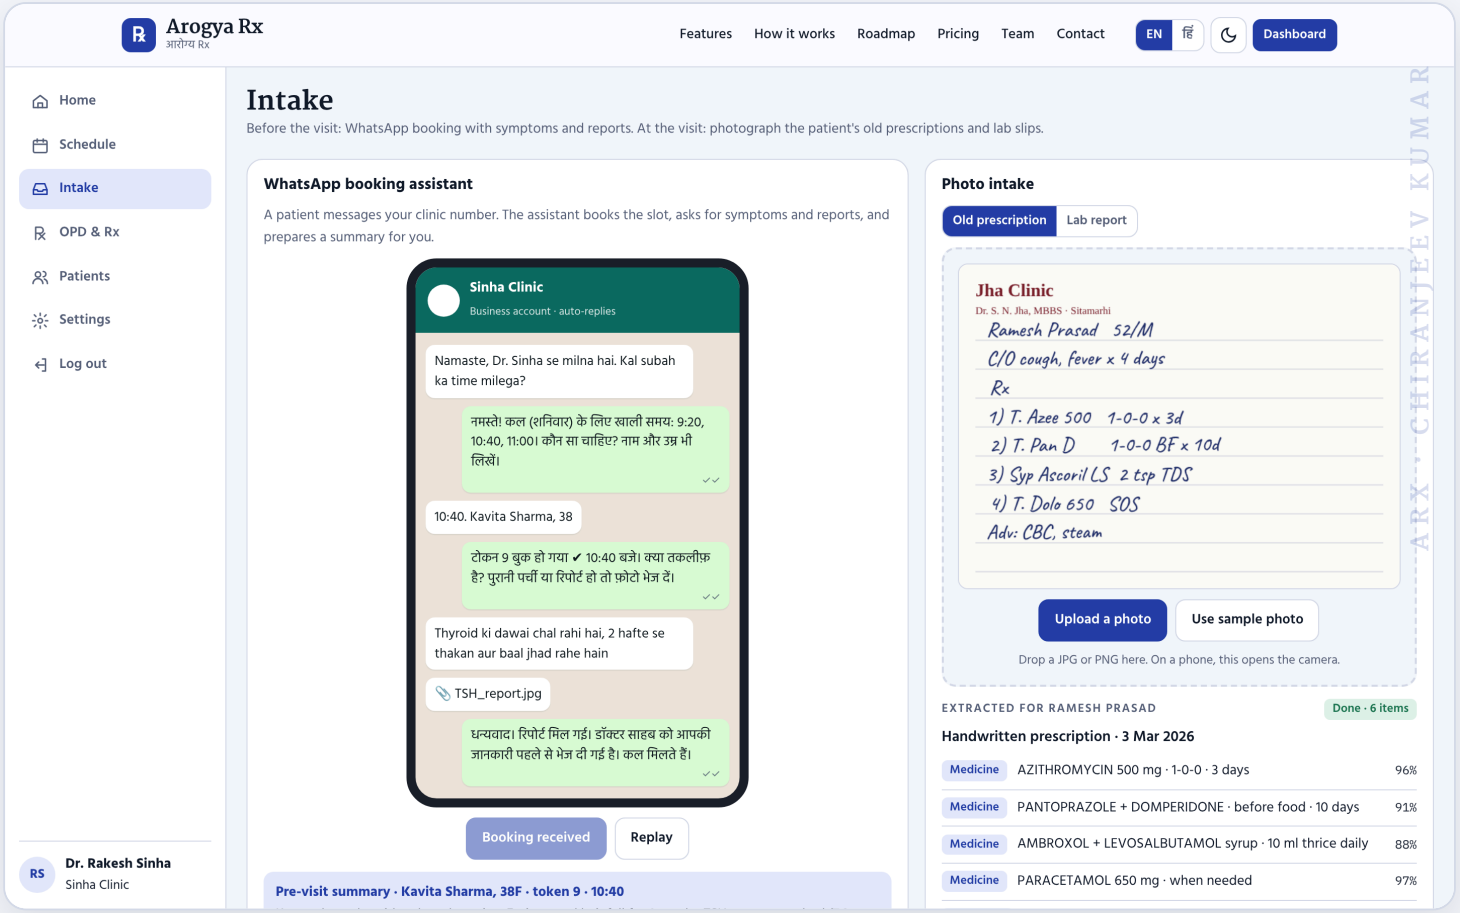

BEFORE AND AFTER THE VISIT

WhatsApp does the front-desk work

रिसेप्शन का काम WhatsApp करता है

After the visit: PDF plus a Hindi dose schedule. The patient replies 1 to book the follow-up.

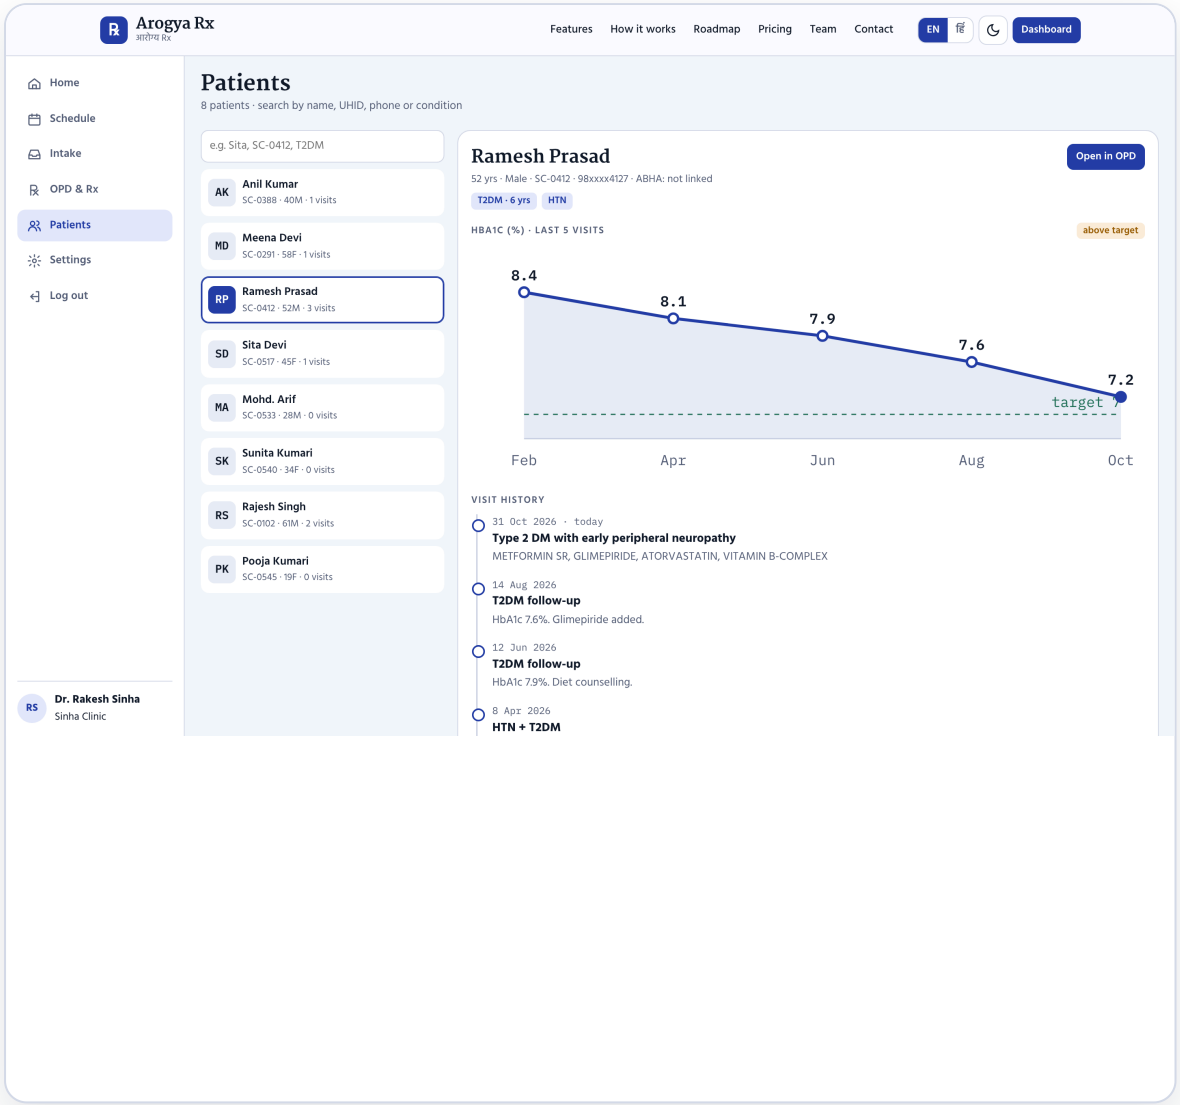

Before the visit: the booking assistant takes the slot, symptoms and report photos. Photo intake reads old prescriptions and lab slips into structured history.

Chiranjeev Kumar · +91 95465 19953

EVERY PATIENT, REMEMBERED

History and trends at a glance

हर मरीज़ का इतिहास, एक नज़र में

Trend against target

HbA1c, BP and sugar plotted across visits, with the target line. You see at once whether treatment is working.

Eight chronic-disease profiles

Diabetes, BP, COPD, TB, thyroid, heart, kidney and stroke, each with the fields that matter (HbA1c, eGFR, LVEF, inhalers).

Ask in plain words

"Diabetic patients with HbA1c above 7" or "who is due this week": answered from your own records.

EVERYTHING INCLUDED

What works today, and what's coming

आज क्या चलता है, और आगे क्या आएगा

Live today at Arogya Clinic

- Prints exactly like your parchi
- 2,05,507 medicines, with prices
- Vitals with red flags; normal exam pre-filled
- Eight chronic-disease profiles
- Patient list and clinic dashboard
- Autosave every 2 seconds

In pilot shown in the demo

- One-tap diagnosis templates
- Hindi dose line for every medicine
- Generic-first + Jan Aushadhi savings
- Allergy and duplicate-drug checks
- WhatsApp parchi and follow-up reminders
- Token queue and reception login
- Speak the consult in Hinglish
- Photo intake of old Rx and lab reports
- Patient timeline with HbA1c / BP trends
- Ask Arogya: plain-language search
- WhatsApp booking and pre-visit summary

Roadmap 2026–27

- Works offline, syncs later
- AI pre-visit summary and possible diagnoses
- Billing, receipts and UPI
- ABHA / ABDM linking
- Lab and pharmacy connections
- Nursing homes and multi-doctor clinics
- Nikshay (TB) and HMIS reporting
- Bhojpuri, Maithili, Bengali, Urdu
- Doctor-in-10-minutes teleconsult
- Recall campaigns for chronic patients
- DPDP-ready security and audit log

ARX · CHIRANJEEV KUMAR

Chiranjeev Kumar · +91 95465 19953

ROADMAP

Four phases to 150 clinics

चार चरण, 150 क्लिनिक तक

Now

Nov 2026

1 · Secure the core

- Each clinic's data walled off
- OTP login, staff roles, audit log
- India hosting, encryption, backups

Gate: Arogya Clinic migrated

Dec 2026

2 · Ready to sell

- Letterhead builder
- Templates, Hindi doses, allergy checks
- WhatsApp parchi and reminders
- Offline mode, UPI subscriptions

Gate: 10 paying clinics

Jan–Apr 2027

3 · AI that saves minutes

- Voice to prescription
- Photo intake of old Rx and reports
- WhatsApp booking assistant
- Billing, receipts, token screen

Gate: 50 paying clinics

May–Oct 2027

4 · Scale across Bihar and UP

- ABHA / ABDM linking
- Labs, pharmacies, nursing homes
- Teleconsult, recall campaigns
- Nikshay and HMIS reporting

Goal: 150 paying clinics

ARX · CHIRANJEEV KUMAR

Safety first

AI only drafts. **The doctor checks every line and nothing prints without the doctor's confirmation.** Data stays in India, encrypted, with a separate login for each staff member and a record of every change.

Chiranjeev Kumar · chiranjeevkumar47@gmail.com

Arogya Rx

GETTING STARTED TAKES 3 DAYS

Send us a photo of your pad. We'll do the rest.

अपने पैड की फ़ोटो भेजें, बाकी हम करेंगे।

Day 1
We rebuild your letterhead and load templates for your 10 most common diagnoses.

Day 2
On-site setup on your laptop, tablet or phone, with a reception login. About 20 minutes.

Day 3
Your first 50 patients on Arogya Rx, with WhatsApp support for two weeks.
